MODULAR  
KITCHEN

# About

## Modular Kitchen

A modular kitchen is simply a modern and flexible way to design your kitchen, allowing you to choose a variety of cabinets for different functions which come in “modules.” The modules are available in different sizes which can suit various functions depending on which area of the kitchen you would choose to use the module. They are also available in any number of colours, styles and finishes which can affect the price, but also means that you will be able to find the right style to suit the look and feel you are trying to achieve in your kitchen.

A modular kitchen is highly customisable, meaning you are able to select the cabinet layouts and types to meet your storage needs in the kitchen without having to settle for run-of-the-mill cabinets that don't fulfil the purposes you require in your kitchen.

contd.

B.

MODULAR  
KITCHEN

# About

## Modular Kitchen

---

For instance, one module might offer standard shelving, while another could offer storage for wine, spices or glassware, or even an island if you have space for one. You're also not limited to the lower cabinets of your kitchen, and if you require a wall mounted or overhead cabinets, these are equally customisable as the lower cabinets. The options are endless with a modular kitchen, as you can mix layouts and designs to make the perfect combination.

Modular kitchens are also very stylish, streamline and affordable. The added benefit of this is that you can have a tailored kitchen with the bespoke feel and layout that you need without having to pay for a custom kitchen, essentially purpose-built to fit your space.

B.

1

## ACRYLIC RANGE

Simply put, acrylic is a non-toxic finish that gives a perfectly smooth texture and a high-gloss appearance to kitchen cabinets. This high-quality synthetic material comes with a perfect mirror-like finish that's shatter-resistant, and also does not chip or crack easily. Acrylic is ideal for kitchen cabinets that have flat surfaces as they create a glossy finish that is perfect for modern kitchens. These modular kitchen laminates are available in various textures and a wide variety of colours and finishes like matte, glossy and ultra-high gloss.

MODULAR  
KITCHEN

2

## BLACK PAINTED GLASS RANGE

---

Glass adds luxury to your kitchen and makes it look neat and clean. Back painted glass is stuck on surface of marine ply shutters & it's toughened so in-case glass breaks, it will not harm you. Painting is done on the back side of glass so there is no chance of colour fading in future. There are numerous colours to choose from and you have the liberty of matching the colours with existing interiors and theme.

MODULAR  
KITCHEN

# 3

## CERAMIC RANGE

---

We provide Ultra-modern, durable and innovative handle less ceramic kitchens collection. Premium matt finish of real ceramic kitchen doors create unique kitchen decor. The doors and the kitchen shutters in ceramic represent one of the most innovative solution that we have recently proposed with our kitchens. Ceramic shutters for kitchens using aluminium profile or over laminate shutters for decorative panels is the most extravagant way of showcasing your premium kitchens with style.

MODULAR  
KITCHEN

6

## LAMINATES

---

Laminate cabinets are easier to clean than wood, they offer more durability over time and tend to conceal fewer scratches than solid wood cabinets and cabinet doors. Typically, plywood, timber, Kraft paper and plastic is used as kitchen laminates. They are available in an array of colors, textures and finish, giving you a wide range of choices to beautify your kitchen. Besides improving aesthetic appeal, laminate also add functionality to the space.

## MODULAR KITCHEN

# 7

## METALLIC RANGE

Far from appearing cold and sterile, metallics can be warm and tactile. You needn't use the metallic finish across the entire kitchen – sometimes, limiting it to a kitchen island will have impact. Doors and drawers that look fresh from the foundry are ideal for metallic kitchens. While chrome and stainless steel are a long-standing staple of kitchen design, the new metals have a more industrial vibe – like pieces plucked from an old factory rather than a food preparation area, so look for brushed steel rather than polished finishes.

# 8

## MICROTREATED RANGE

---

BOURBON Micro Treated range of Kitchen finishes offer you an edge over conventional look and feel of your Modular Kitchen. We provide you with treated High Gloss AntiScratch Acrylic as well as smudge free, finger print resistant 100% matte Acrylic finishes for your Class Defying Interiors. Change is constant but with these finishes your kitchen designs will keep looking modern for the next 100 years.

# MODULAR KITCHEN

# 9

## PU RANGE

---

PU (polyurethane) is acrylic based clear coating paint. Which is on a higher side than laminate, where 5 coatings of PU is done after two coatings of primer on thin sheet of matt white laminate in air packed room. You can choose any colour on surface for your kitchen cabinets, it is weather resistance and also easy to maintain and clean.

# MODULAR KITCHEN

B.

# 10

## VENEER RANGE

---

Whilst solid wood cabinets and doors offer a stunning aesthetic, you may find that it comes at a greater expense than your budget. A more affordable alternative to solid wood yet virtually identical are wood veneers, which feature a beautiful sheen and are manufactured in the most modern facilities. The base of our veneer cabinets are constructed using synthetic material, making them more stable than a solid wood cabinet and eradicating the possibility of distortion as is seen with solid wood due to exposure to changing temperatures and humidity. Thin slices of real wood are joined to the artificial core, available in a range of woods and expensive timbers. The

# ENTRANCE & HOME AUTOMATION

## OVERHEAD GARAGE DOOR

The garage door is the gateway to your home. By choosing an residential garage door, you are doing more than making a home improvement investment. You are making us a part of your daily life and relying on us for safety, security and dependable operation. Indulge your sense of design with a garage door that sets your home apart with style, appearance, safety and comfort.

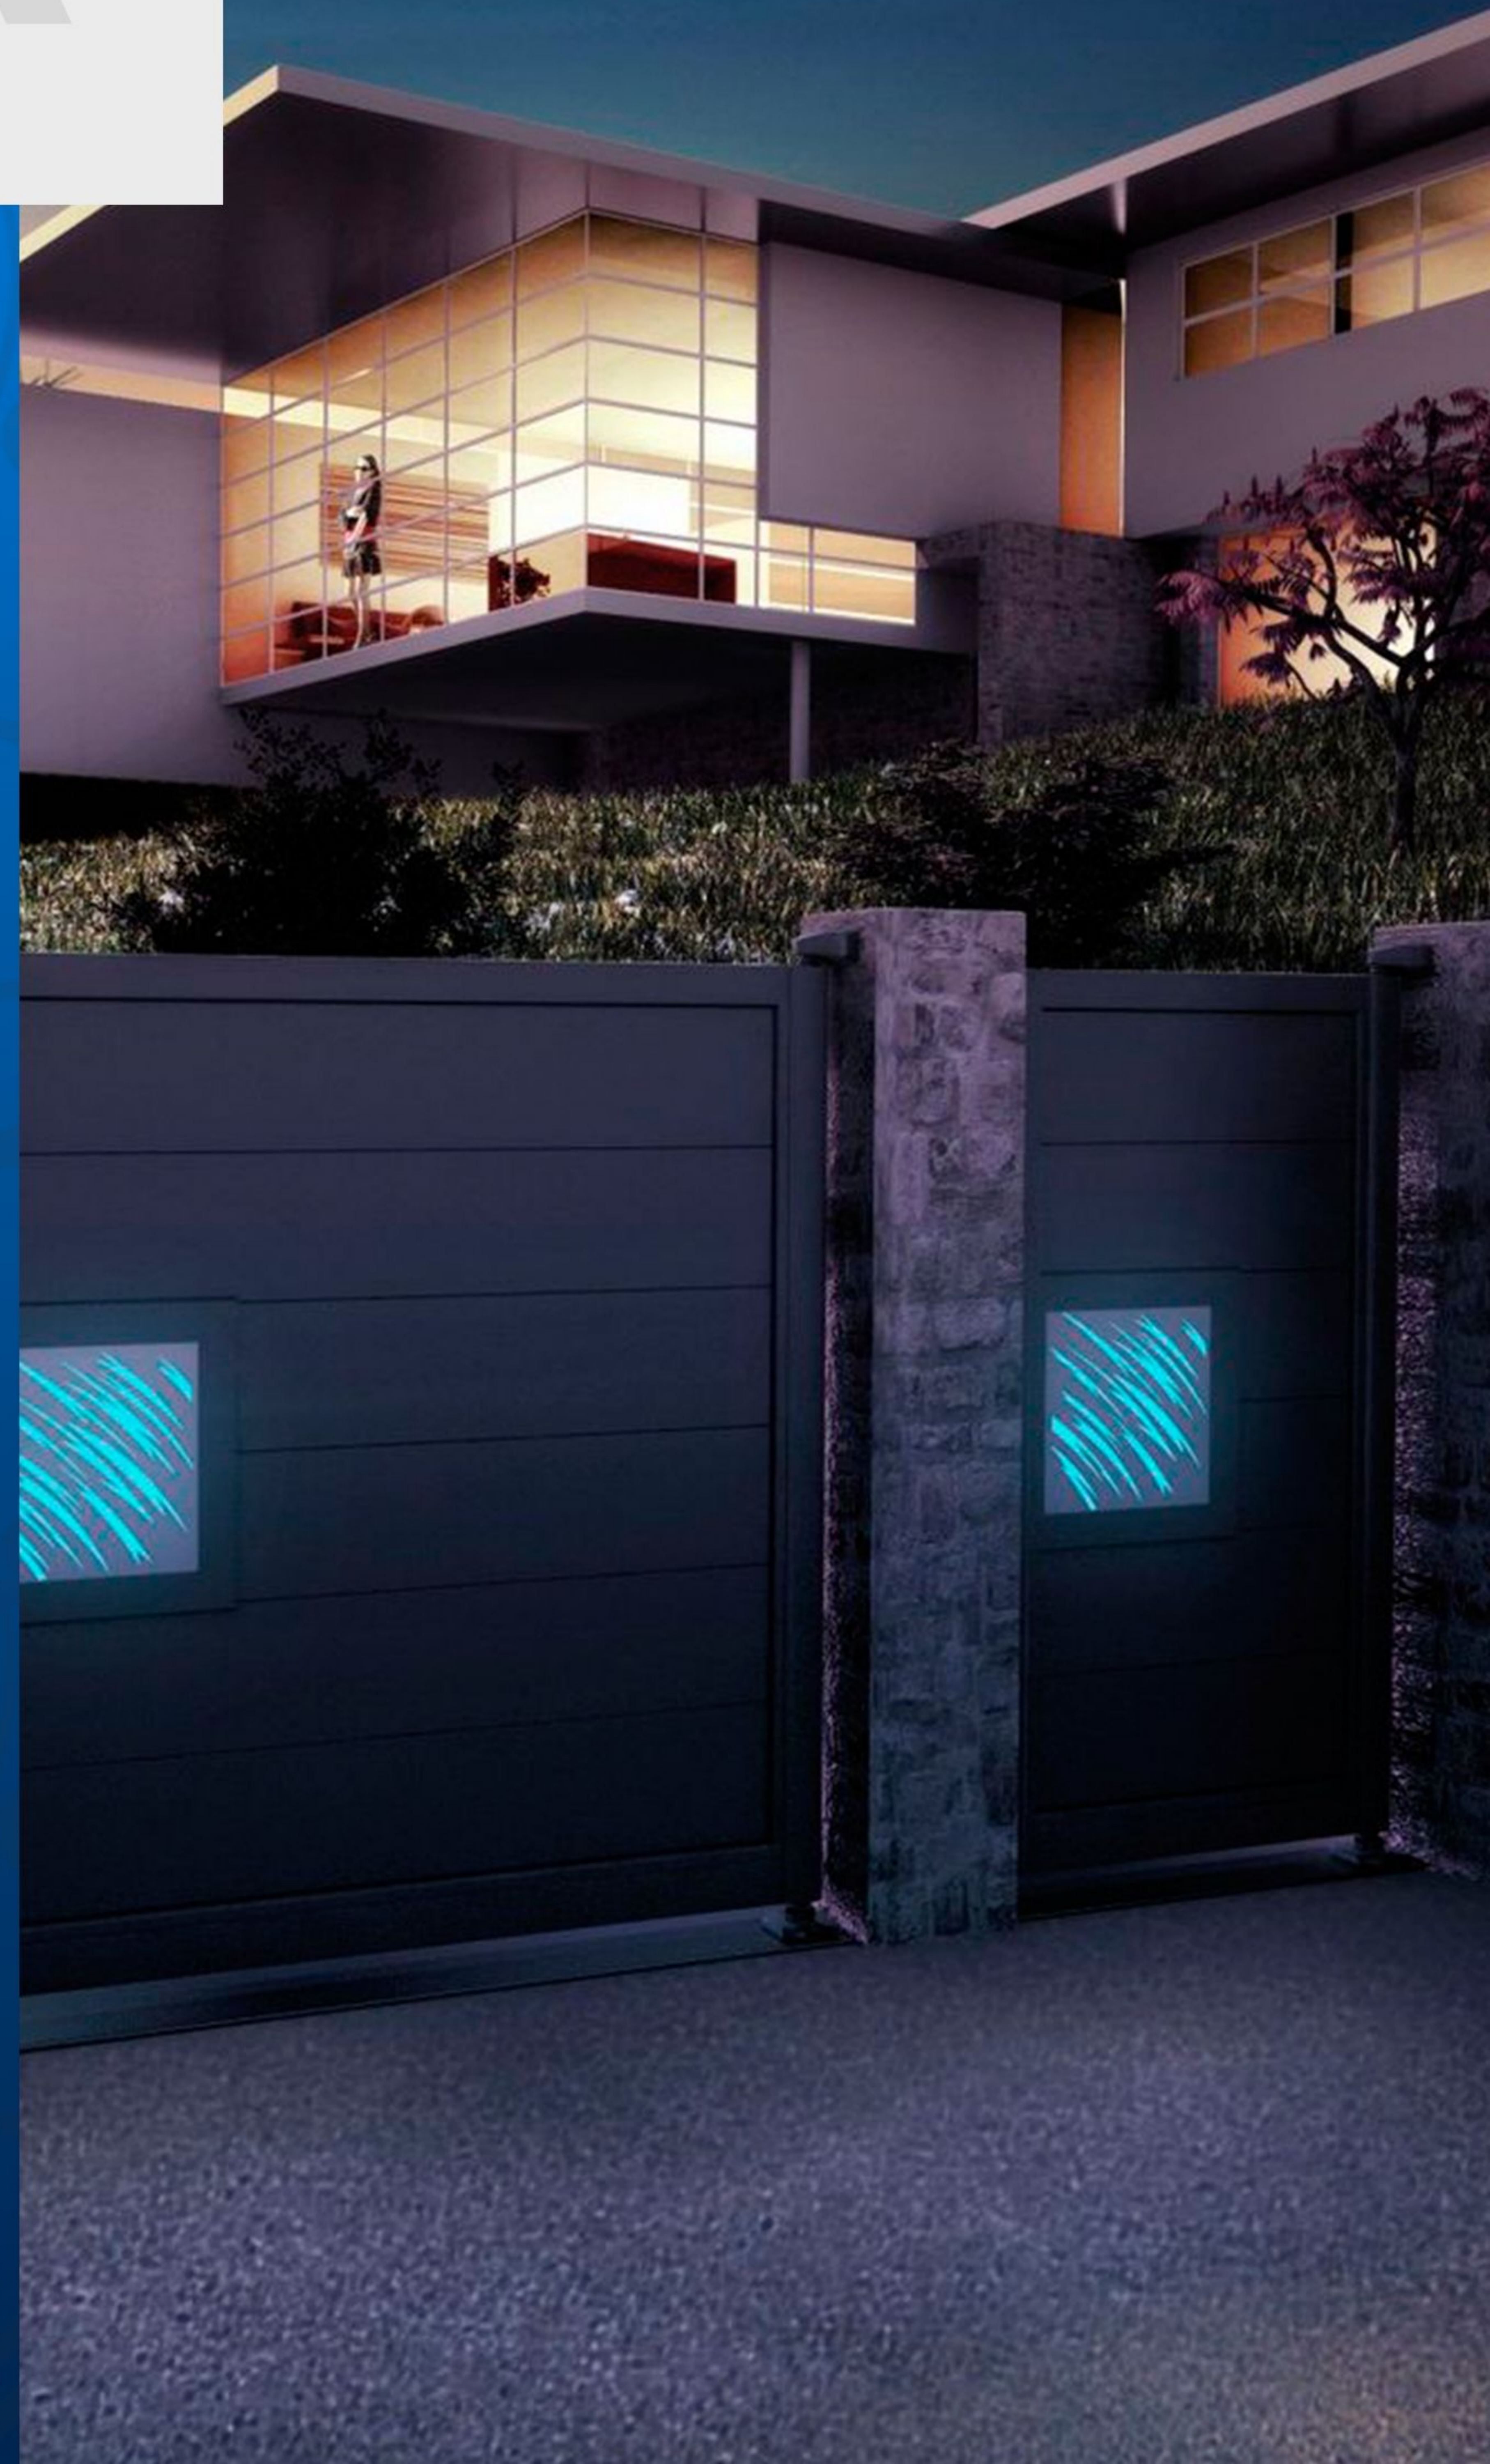

*NEED TO CHANGE*

AUTOMATION

# ENTRANCE & HOME AUTOMATION

## SWING GATES AND DOORS

swing gates are gates that open and close automatically with the help of electronic, hydraulic or mechanical devices called swing gate operators. Swing gates reduce the need for humans to open and close the gate, and are increasingly becoming a mainstay in shared facilities, such as airport terminals. Technological advances and the need for automation across various industries is driving swing gate adoption.

AUTOMATION

*NEED TO CHANGE*

# ENTRANCE & HOME AUTOMATION

## SLIDING GATES AND DOORS

A sliding door is a type of door which opens horizontally by sliding, usually parallel to a wall. Sliding doors can be mounted either on top of a track below or be suspended from a track above and some types 'disappear' in a wall when slid open.

B.

*NEED TO CHANGE*

# ENTRANCE & HOME AUTOMATION

## ROLLING SHUTTERS

A roller shutter, coiling door, roller door or sectional overhead door is a type of door or window shutter consisting of many horizontal slats (or sometimes bars or web systems) hinged together. The door is raised to open it and lowered to close it. On large doors, the action may be motorized. It provides protection against wind, rain, fire and theft. In shutter form, it is used in front of a window and protects the window from vandalism and burglary attempts.

# ENTRANCE & HOME AUTOMATION

## HYGIENE DOORS

Hygienic doors are those have been purpose built with sanitation being of utmost importance, meaning they will not harbour bacteria and other pests, and are unaffected by moisture and common cleaning chemicals. Our hygiene door sets have been designed to ensure optimum hygiene levels are ensured at all times. They offer the highest resistance to bacteria and are other harmful agents and are very easy to clean. They are also extremely versatile, and can be tailored to meet the needs of any commercial or industrial space.

B.

AUTOMATION

# PARKING SOLUTIONS

## PARKING MANAGEMENT

The Parking Management System provides electronic monitoring and management of parking facilities. It supports an I2V link to the Vehicle that allows electronic collection of parking fees and monitors and controls parking meters that support conventional parking fee collection.

B.

AUTOMATION

# PARKING SOLUTIONS

## GPS TRACKER

A GPS tracking unit is a navigation device normally carried by a moving vehicle or person or animal that uses the Global Positioning System (GPS) to track the device's movements and determine its location. The recorded location data can either be stored within the tracking unit or transmitted to an Internet-connected device using the cellular (GPRS or SMS), radio, or satellite modem embedded in the unit. This allows the location to be displayed against a map backdrop either in real time or when analysing the track later, using GPS tracking software.

B.

AUTOMATION

Master

# FIRE & SAFETY SOLUTIONS

## FIRE HYDRANT SYSTEM

Fire hydrant systems are installed in buildings to help firefighters quickly attack the fire. Essentially, a hydrant system is a water reticulation system used to transport water in order to limit the amount of hose that firefighters have to lay, thus speeding up the fire fighting process.

B.

AUTOMATION

# FIRE & SAFETY SOLUTIONS

## FIRE ALARM SYSTEM

A fire alarm system consists of fire sensors, such as smoke and heat detectors, located throughout the building, connected to a main alarm panel by special cables. The panel will indicate the location of the fire to the persons manning it so that they can coordinate the evacuation process.

# FIRE & SAFETY SOLUTIONS

## FIRE ALARM SYSTEM

A fire extinguisher is an active fire protection device used to extinguish or control small fires, often in emergency situations.

A  
AUTOMATION

# FIRE & SAFETY SOLUTIONS

## EXIT LIGHTS AND SIGNS

An exit sign is a device in a public facility (such as a building, aircraft, or boat) denoting the location of the closest emergency exit in case of fire or other emergency. Most relevant codes (fire, building, health, or safety) require exit signs to be permanently lit.

B.

AUTOMATION

# FIRE & SAFETY SOLUTIONS

## EVACUATION SYSTEM

Evacuation system. The purpose of an evacuation alarm system is to warn the individuals in a particular room/area about a fire or dangerous situation. This can be achieved by special cables and fitting or by ring loop systems with two-way operation in the event of a break or short circuit.

# FIRE & SAFETY SOLUTIONS

## FIRE DOORS AND FIRE SUITS

### FIRE SUITS

A fire proximity suit (also, silvers, silver bunker suit, or asbestos suit) is a suit designed to protect a firefighter or volcanologist from extremely high temperatures. They were first designed and used in the 1930s. Originally made of asbestos fabric, current models use vacuum-deposited aluminized materials.

A fire door is a door with a fire-resistance rating (sometimes referred to as a fire protection rating for closures) used as part of a passive fire protection system to reduce the spread of fire and smoke between separate compartments of a structure and to enable safe egress from a building or structure or ship. In North American building codes, it, along with fire dampers, is often referred to as a closure, which can be derated compared.

# ELECTRONIC SECURITY

## VIDEO SURVEILLANCE (CCTV)

A closed-circuit television camera can produce images or recordings for surveillance or other private purposes. Cameras can be either video cameras, or digital stills cameras. Walter Bruch was the inventor of the CCTV camera. The main purpose of a CCTV camera is to capture light and convert it into a video signal. Underpinning a CCTV camera is a CCD sensor (Charge Coupled Device). The CCD converts light into an electrical signal and then signal processing converts this electrical signal into a video signal that can be recorded or displayed on the screen.

B.

AUTOMATION

## ELECTRONIC SECURITY

### ELECTRONIC ARTICLE SURVEILLANCE

Electronic article surveillance is a technological method for preventing shoplifting from retail stores, pilferage of books from libraries or removal of properties from office buildings. Special tags are fixed to merchandise or books. These tags are removed or deactivated by the clerks when the item is properly bought or checked out. At the exits of the store, a detection system sounds an alarm or otherwise alerts the staff when it senses active tags.

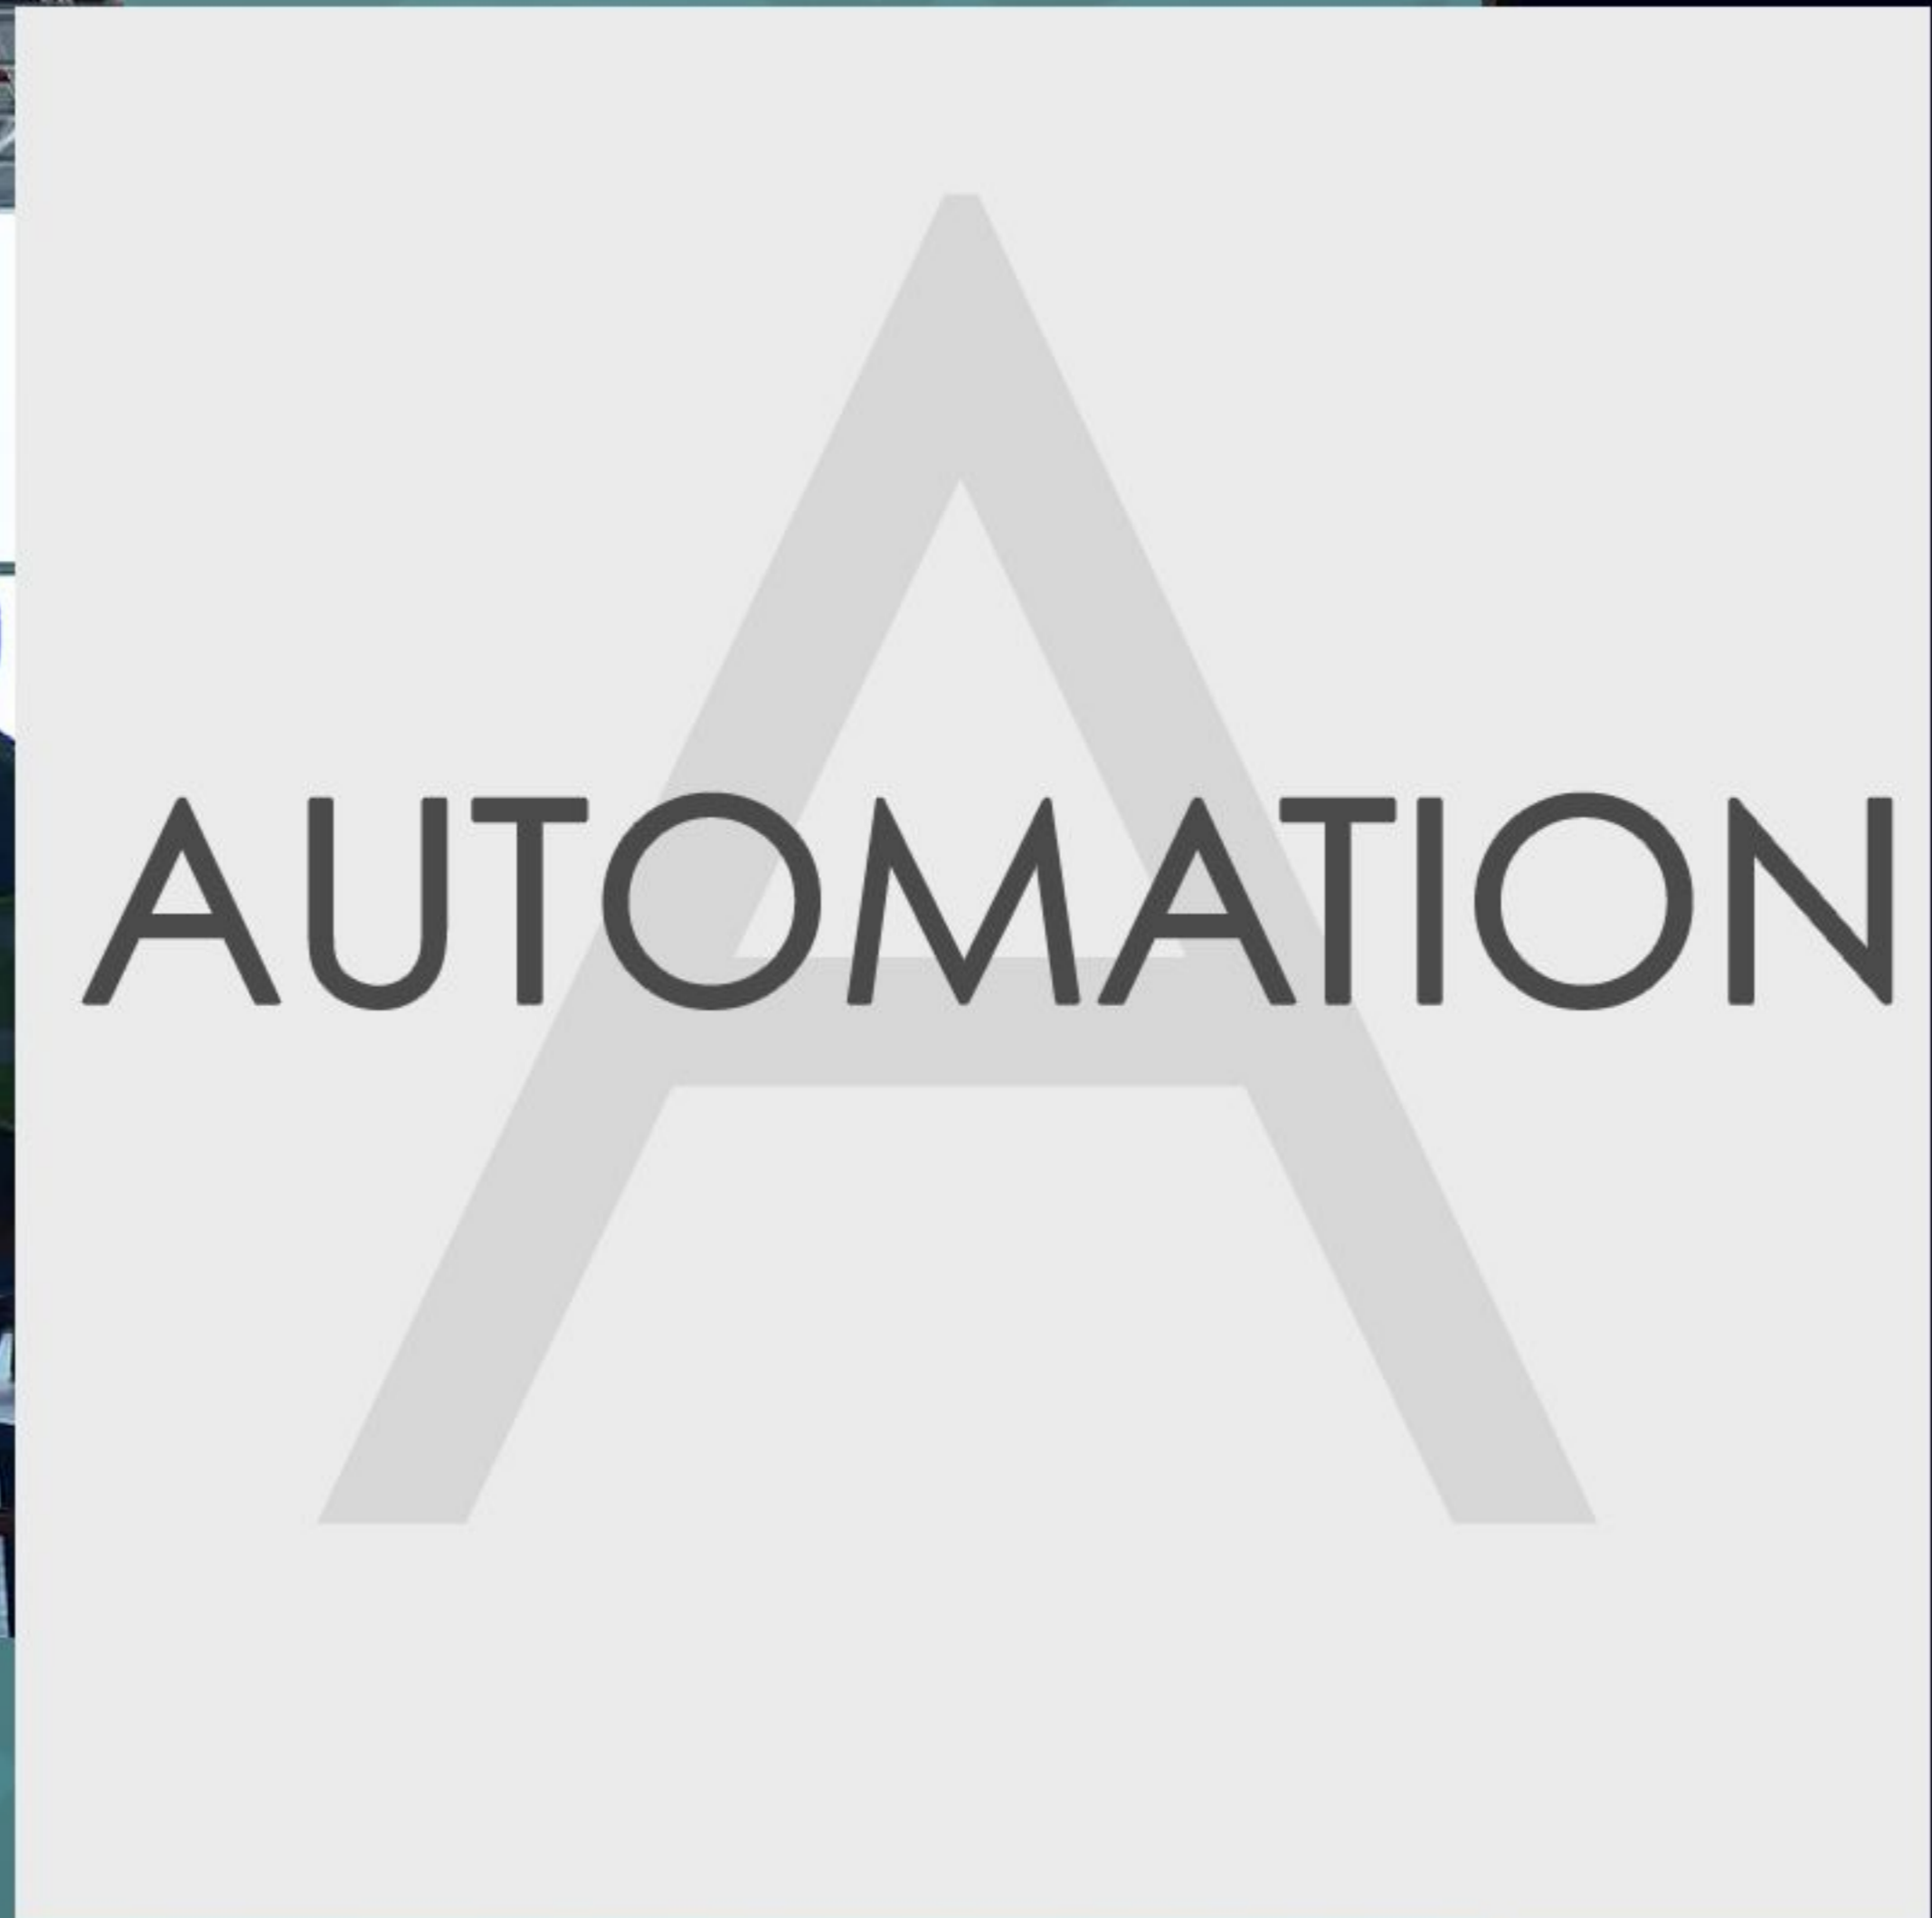

# ELECTRONIC SECURITY

## PUBLIC ADDRESS SYSTEM

A public address system (PA system) is an electronic system comprising microphones, amplifiers, loudspeakers, and related equipment. It increases the apparent volume (loudness) of a human voice, musical instrument, or other acoustic sound source or recorded sound or music. PA systems are used in any public venue that requires that an announcer, performer, etc. be sufficiently audible at a distance or over a large area. Typical applications include sports stadiums, public transportation vehicles and facilities, and live or recorded music venues and events.

# ELECTRONIC SECURITY

## METAL DETECTION

DFMD

A metal detector is an electronic instrument which detects the presence of metal. A Door Frame Metal Detector (DFMD) as the name suggests is a metal detector fitted in a door to detect metal that may be hidden on the body of the person passing through this door. This is also known as a “walk through” metal detector.

Hand held Metal detectors work by transmitting an electromagnetic field from the search coil into the ground. Any metal objects (targets) within the electromagnetic field will become energised and retransmit an electromagnetic field of their own.

HHMD

# ACCESS CONTROL

## BIO METRICS

An electronic lock (or electric lock) is a locking device which operates by means of electric current. Electric locks are sometimes stand-alone with an electronic control assembly mounted directly to the lock. Electric locks may be connected to an access control system, the advantages of which include: key control, where keys can be added and removed without re-keying the lock cylinder; fine access control, where time and place are factors; and transaction logging, where activity is recorded. Electronic locks can also be remotely monitored and controlled, both to lock and to unlock.

AUTOMATION

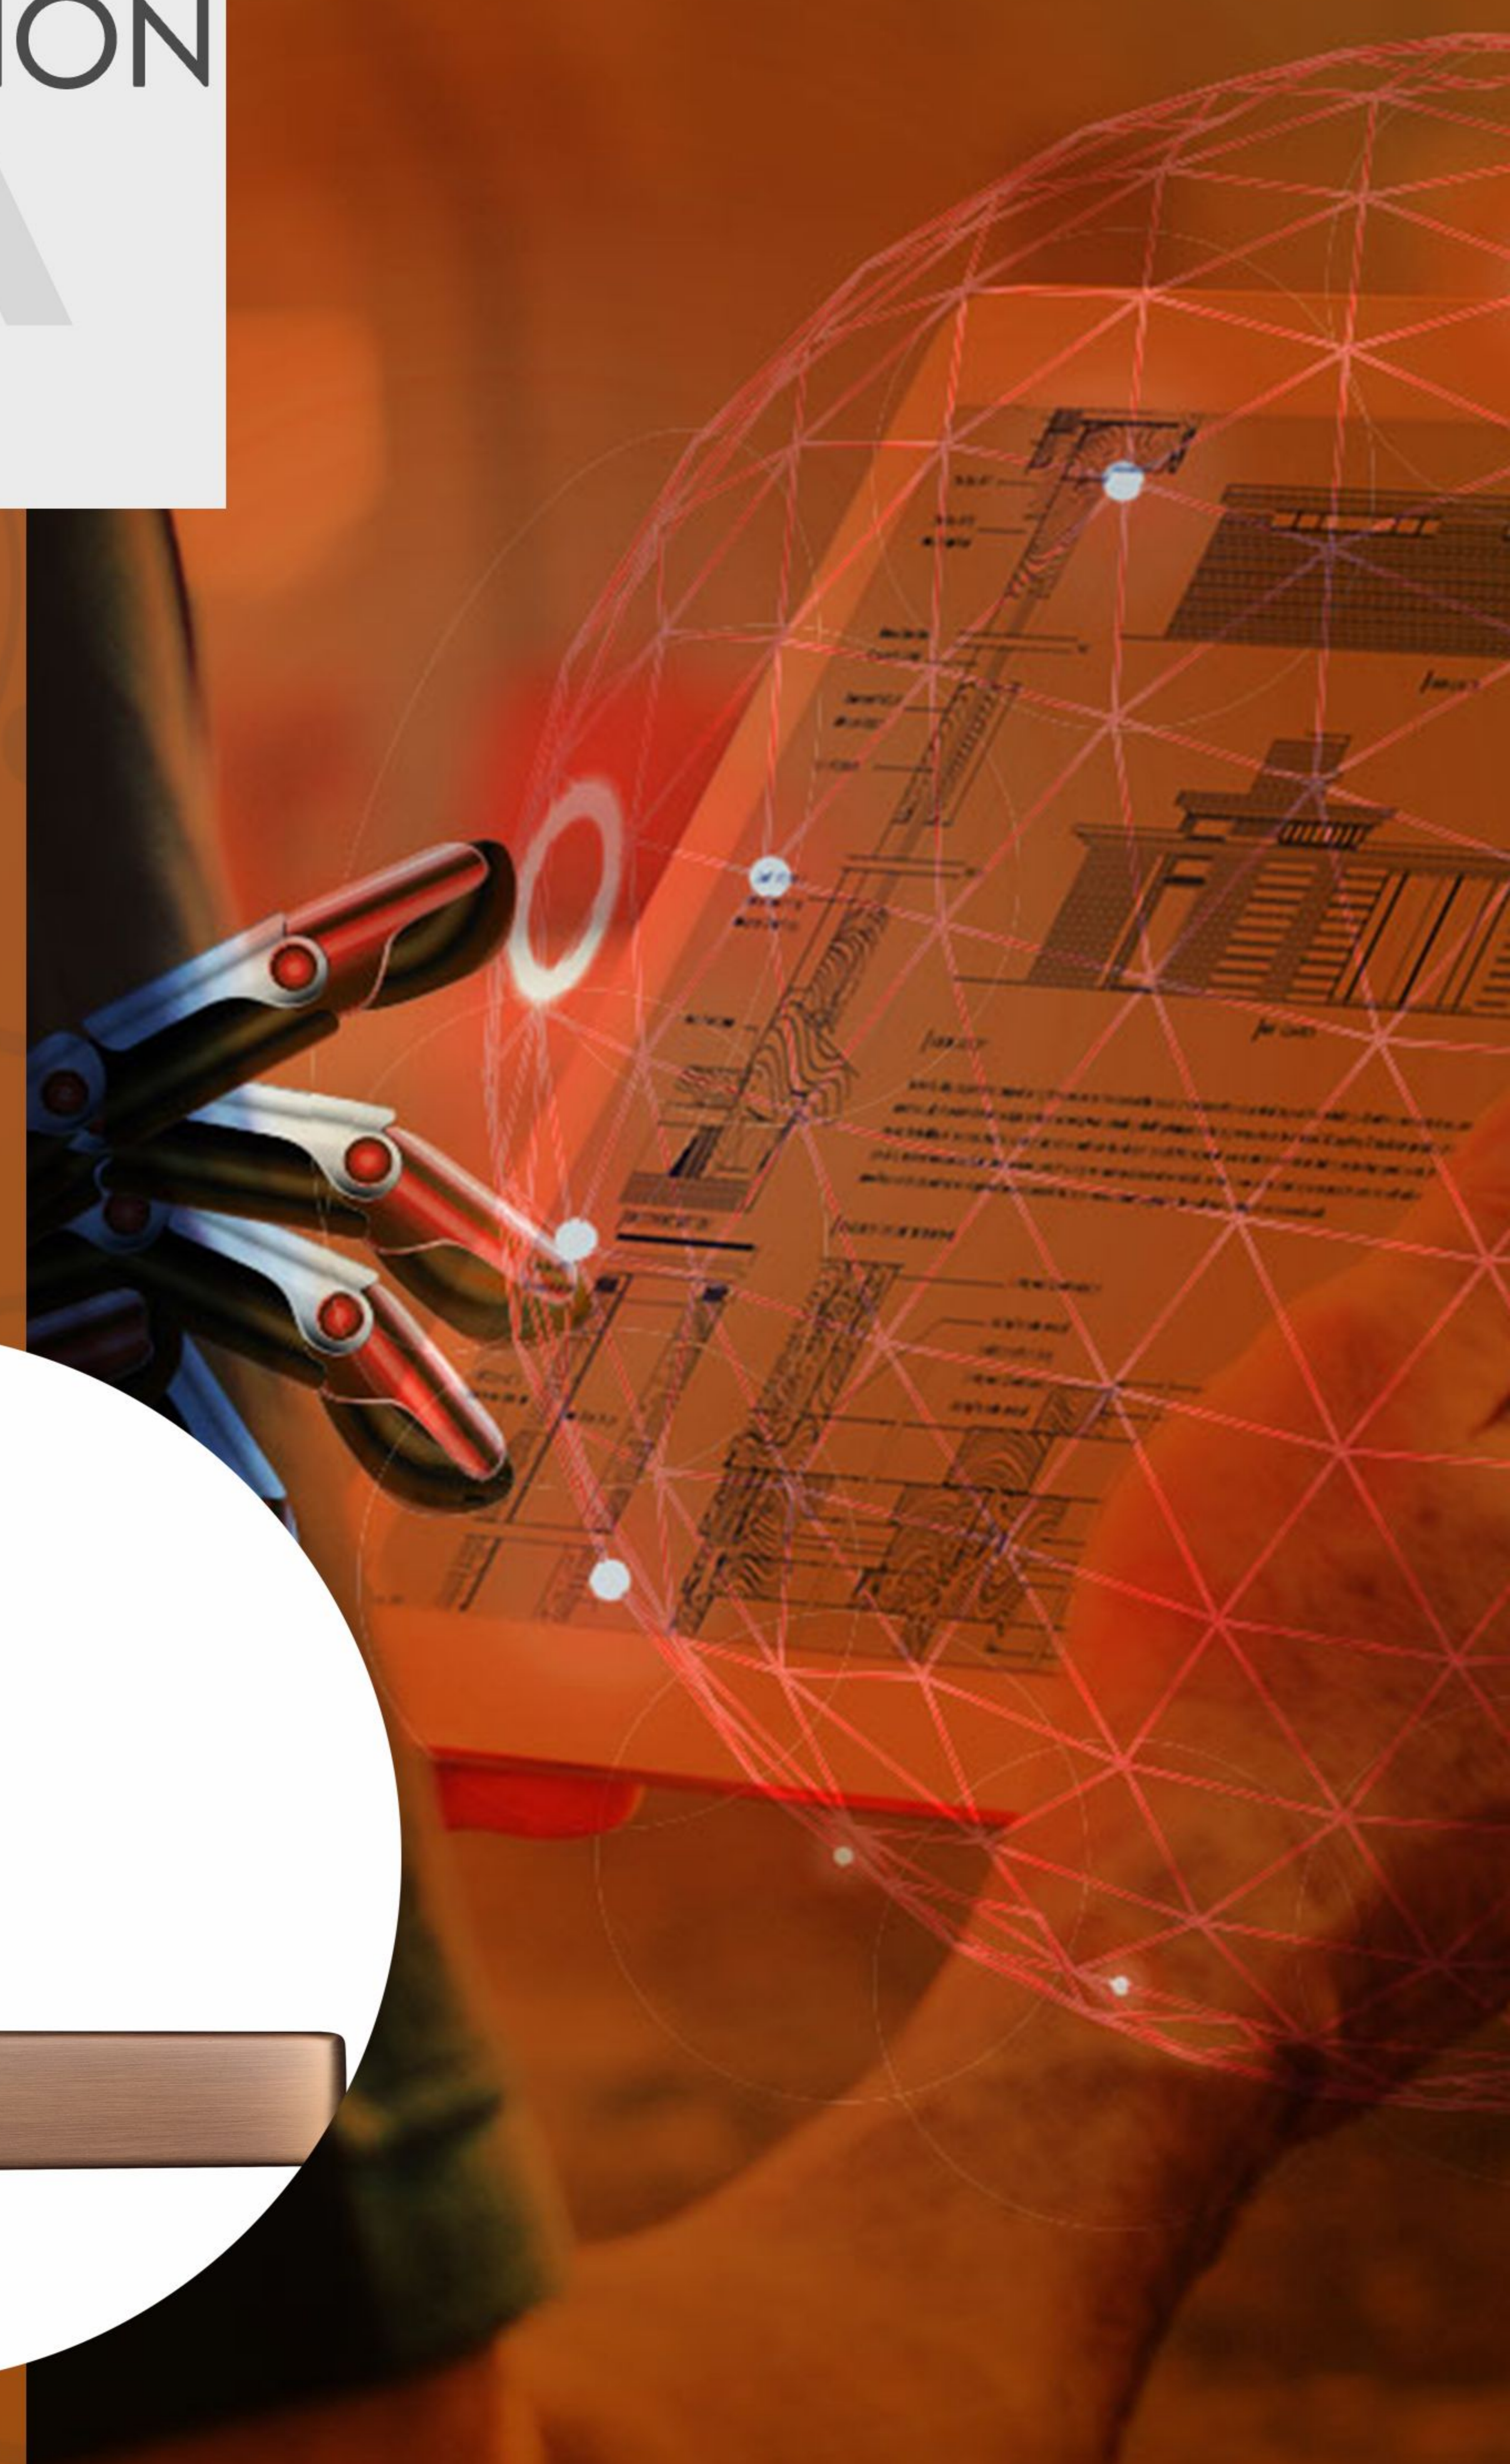

B.

AUTOMATION

# ACCESS CONTROL

## RFID LOCKS

A keycard lock is a lock operated by a keycard, a flat, rectangular plastic card with identical dimensions to that of a credit card or American and EU driver's license. The card stores a physical or digital pattern that the door mechanism accepts before disengaging the lock. There are several common types of keycards in use, including the mechanical holecard, barcode, magnetic stripe, Wiegand wire embedded cards, smart card (embedded with a read/write electronic microchip), and RFID proximity cards. Keycards are frequently used in hotels as an alternative to mechanical keys.

## LIGHT, AUDIO AND VIDEO AUTOMATION

Home automation is building automation for a home, called a smart home or smart house. A home automation system will control lighting, climate, entertainment systems, and appliances. It may also include home security such as access control and alarm systems. When connected with the Internet, home devices are an important constituent of the Internet of Things.

A home automation system typically connects controlled devices to a central hub or "gateway". The user interface for control of the system uses either wall-mounted terminals, tablet or desktop computers, a mobile phone application, or a Web interface, that may also be accessible off-site through the Internet.

AUTOMATION

AUTOMATION

# PARKING SOLUTIONS

## MULTI LEVEL CAR PARKING

A multistorey car park (also called a multistorey, parking structure, parking ramp, parking deck or indoor parking) is a building designed for car parking and where there are a number of floors or levels on which parking takes place. It is essentially an indoor, stacked car park.
